

CLAIMS (clean version)

Claim 1.

G¹
A method for inhibiting nutrient digestibility in a mammal related to control animals by orally feeding said mammal an avian antibody against porcine pancreatic extract that binds lipase in the gastro-intestinal tract of said mammal.

Claim 8.

G²
The method of claim 1 wherein prior to the step of feeding said mammal said avian antibody, said antibody is produced in avian eggs.

Claim 14.

G³
The method of claim 1 wherein prior to the step of feeding said avian antibody, said antibody present on whole egg, egg yolk or purified antibody, is first freeze dried or spray dried.

Claim 18.

G⁴
The method of claim 1 wherein the orally fed antibody, said antibody present on whole egg, egg yolk or purified, is fed in a powder form

Claim 31.

G⁵
The method of claim 1 wherein the orally fed antibody, said antibody present on whole egg, egg yolk or purified, is fed in a liquid form

Claim 38

Please cancel Claim 38 without prejudice

Claim 40

G⁶
The method of claim 1 wherein the orally fed antibody, said antibody present on whole egg, egg yolk or purified, is fed in a enteric protected form.
